

PLACE VALUE

Activities for Children with Dyscalculia

1

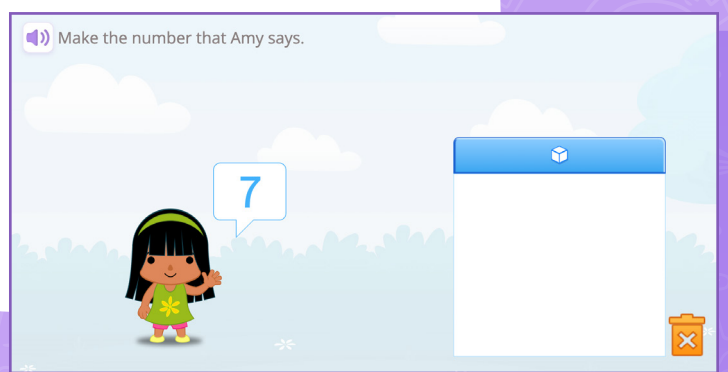

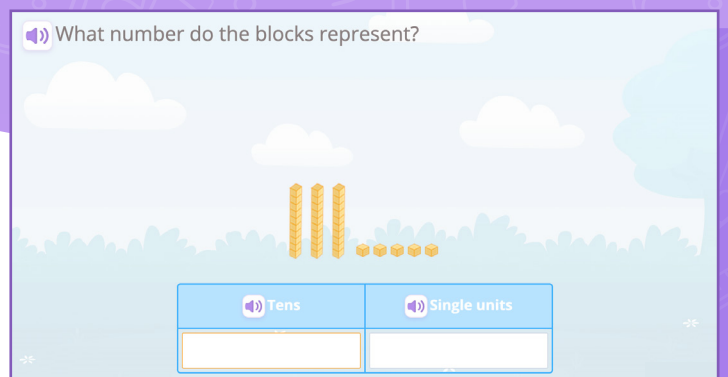

Units and Tens

Provide children with practical exercises in which they will have to group and ungroup objects to understand the concept of units and tens.

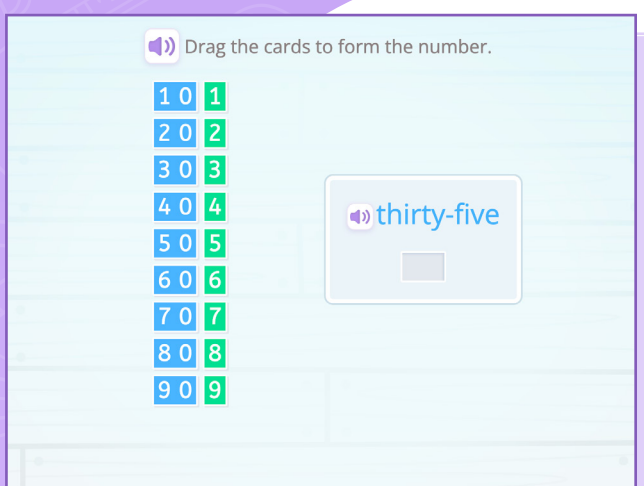

2

Base Ten Blocks

After introducing the material, use the base ten blocks to represent numbers through play.

3

Montessori Cards

Once they have developed their confidence with the base ten blocks, we can start with more abstract work, using Montessori Cards.
